Experiment – 9

Hospital Information System Using Zoho One (SaaS)

Aim

To create a Hospital Information System for SIMATS Hospital using Zoho One as a cloud-based Software as a Service (SaaS) application.

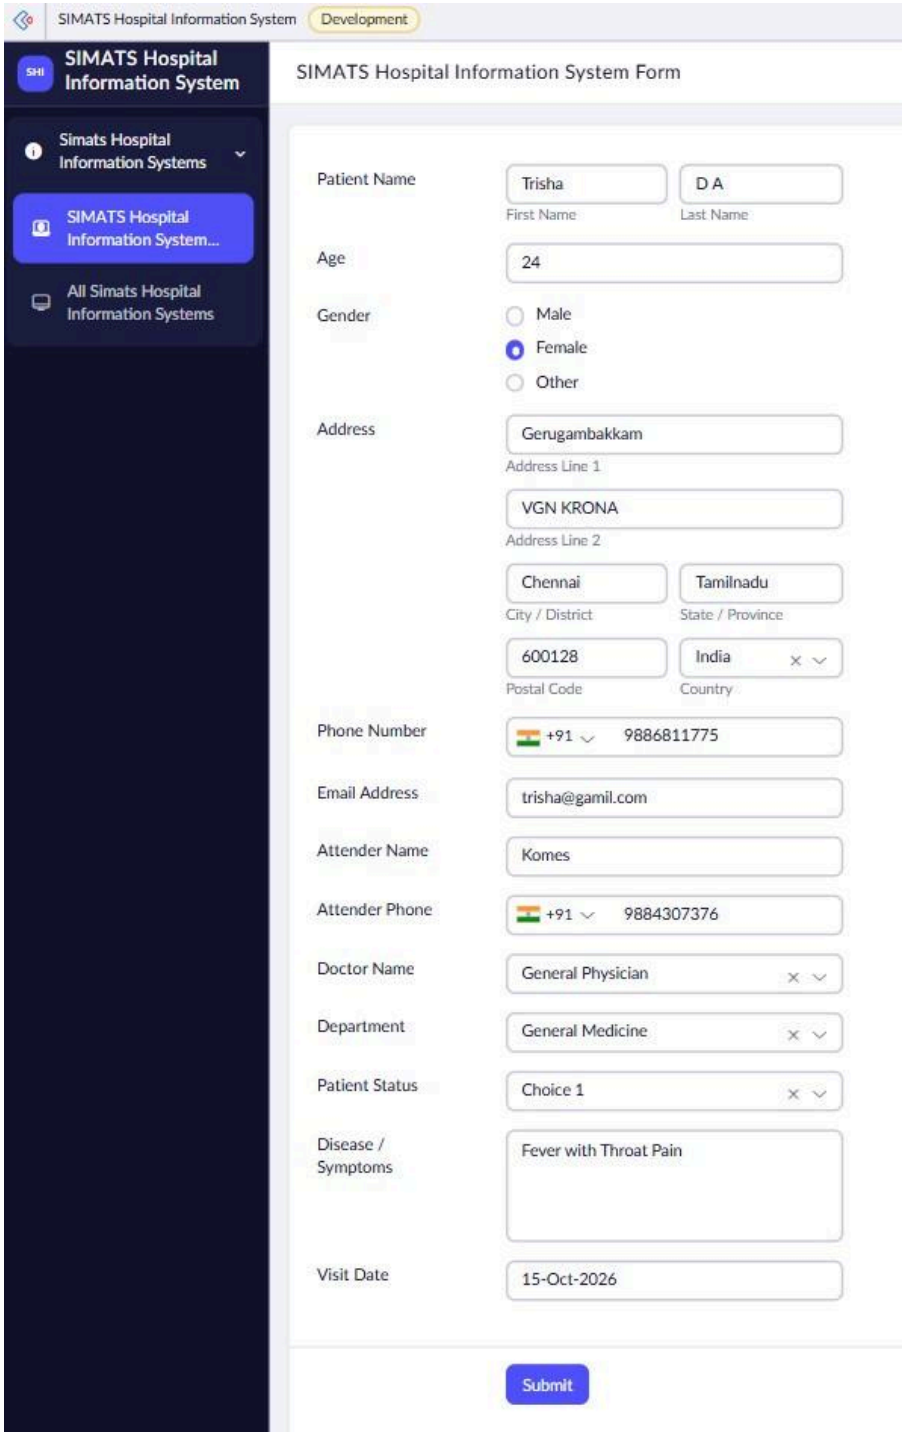

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application named SIMATS Hospital Information System.
4. Create a new form named Patient Information Form.
5. Add the required fields:
    - Patient ID
    - Patient Name
    - Age
    - Gender
    - Address
    - Phone Number
    - Email Address
    - Attender Name
    - Attender Phone
    - Doctor Name
    - Department
    - Disease / Symptoms
    - Visit Date
    - Patient Status (Registered / Under Treatment / Discharged)
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Enter sample patient details into the form.
10. Submit the form and verify that the entered data is stored in the cloud.
11. Test the application using different patient details and medical information.

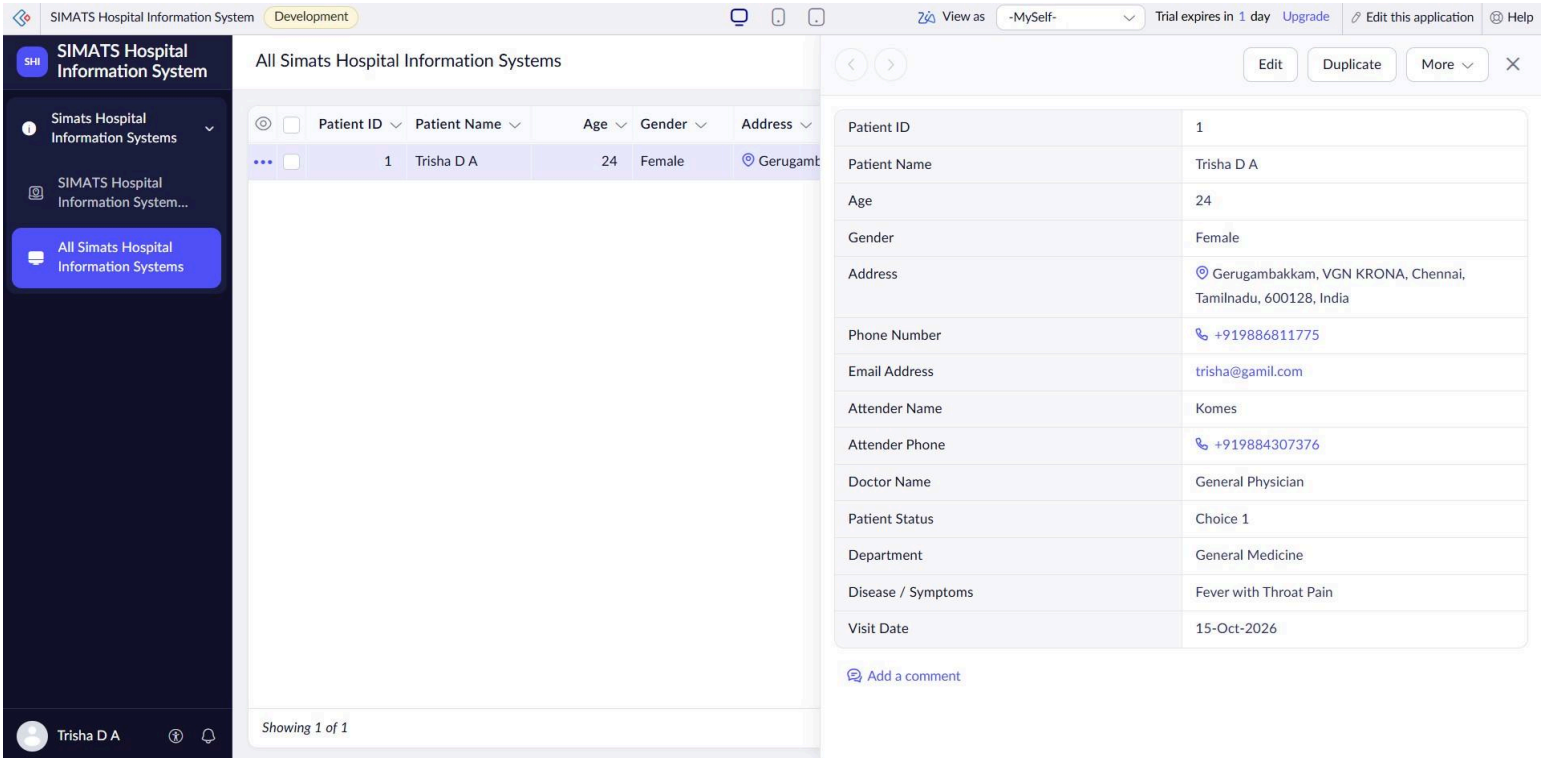

12. Verify that the Hospital Information System works successfully as a SaaS application.

Implementation

Input:

Output:

Result

Thus, a Hospital Information System for SIMATS Hospital was created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
