Experiment – 2

Property Buying and Rental System Using Zoho One (SaaS)

Aim

To create a Property Buying and Rental System for Chennai city using Zoho One as a cloud-based Software as a Service (SaaS) application.

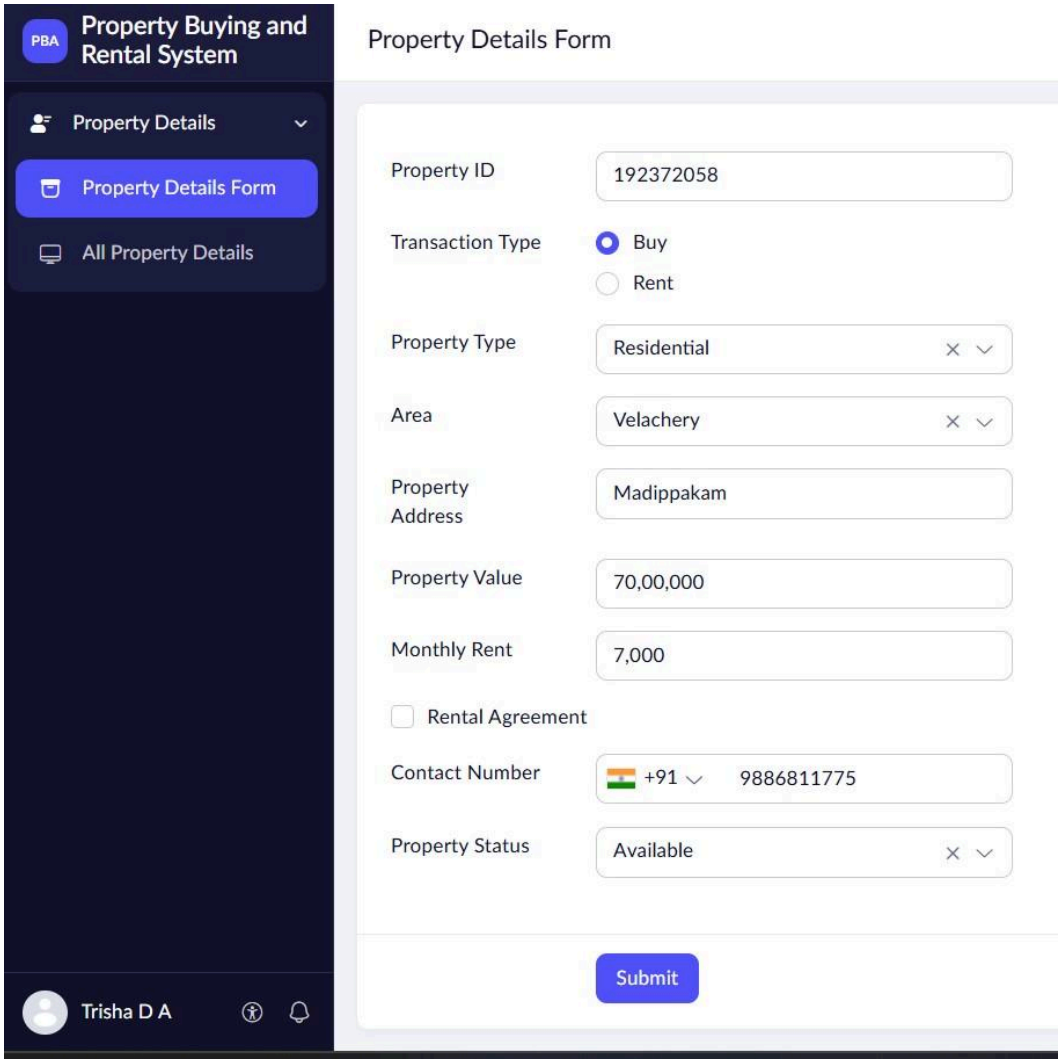

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application named Property Buying and Rental System.
4. Create a new form named Property Details Form.
5. Add the required fields:
    - Property ID
    - Transaction Type (Buy / Rent)
    - Property Type (Residential / Commercial)
    - Area (T. Nagar, Anna Nagar, Velachery, Adyar, Tambaram)
    - Property Address
    - Property Value
    - Monthly Rent
    - Rental Agreement (Yes / No)
    - Contact Number
    - Property Status (Available / Sold / Rented)
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.

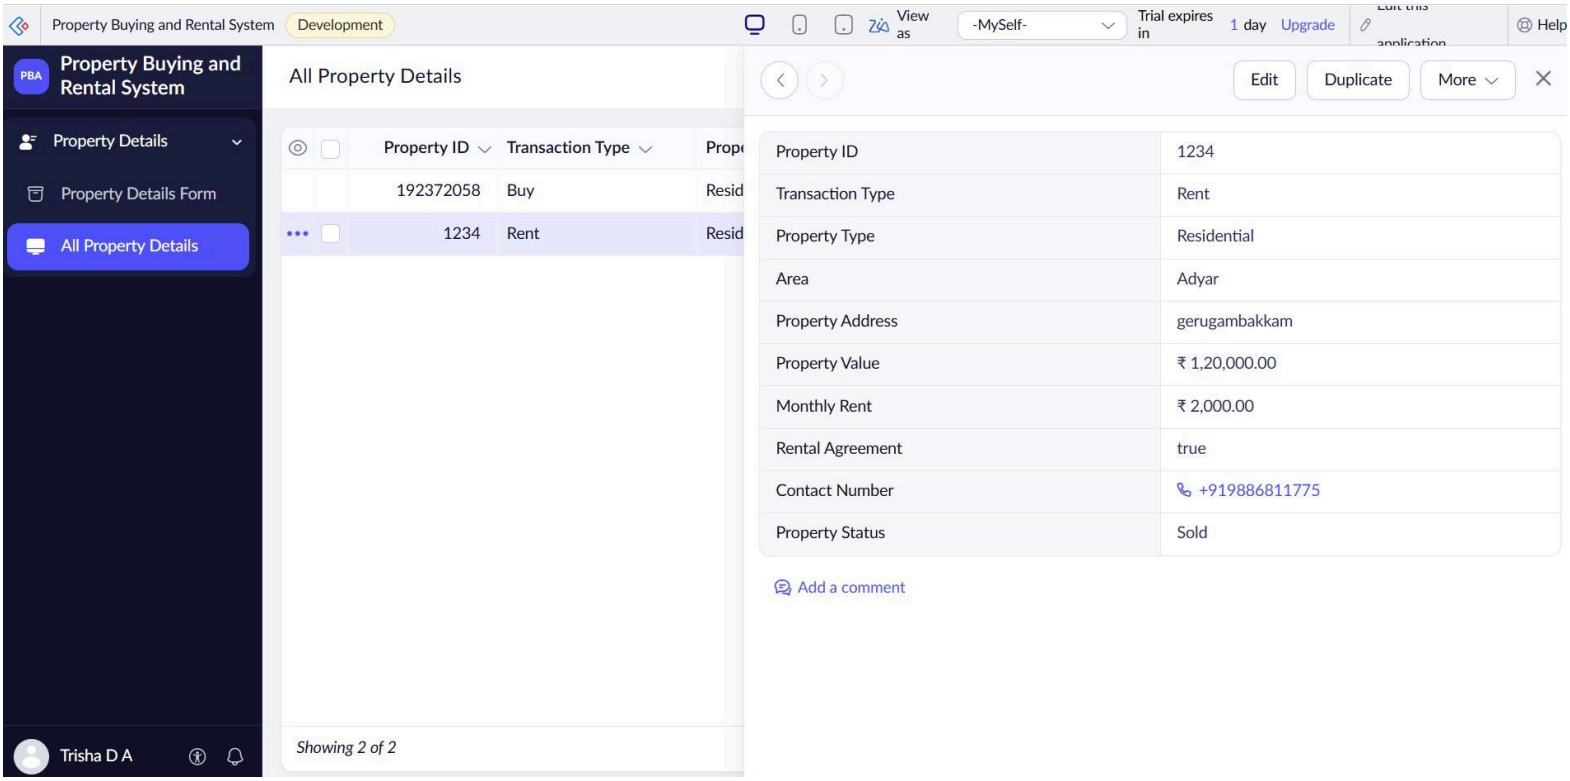

8. Configure workflows for property status updates and rental agreement reminders.
9. Save and publish the form.
10. Enter sample property details into the form.
11. Submit the form and verify that the entered data is stored in the cloud.
12. Test the application by entering different property details for buying and renting.
13. Verify that the Property Buying and Rental System works successfully as a SaaS application.

Implementation

Input:

Output:

Result

Thus, a Property Buying and Rental System for Chennai city was created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
