Experiment – 3

Car Booking Reservation System Using Zoho One (SaaS)

Aim

To create a Car Booking Reservation System using Zoho One as a cloud-based Software as a Service (SaaS) application.

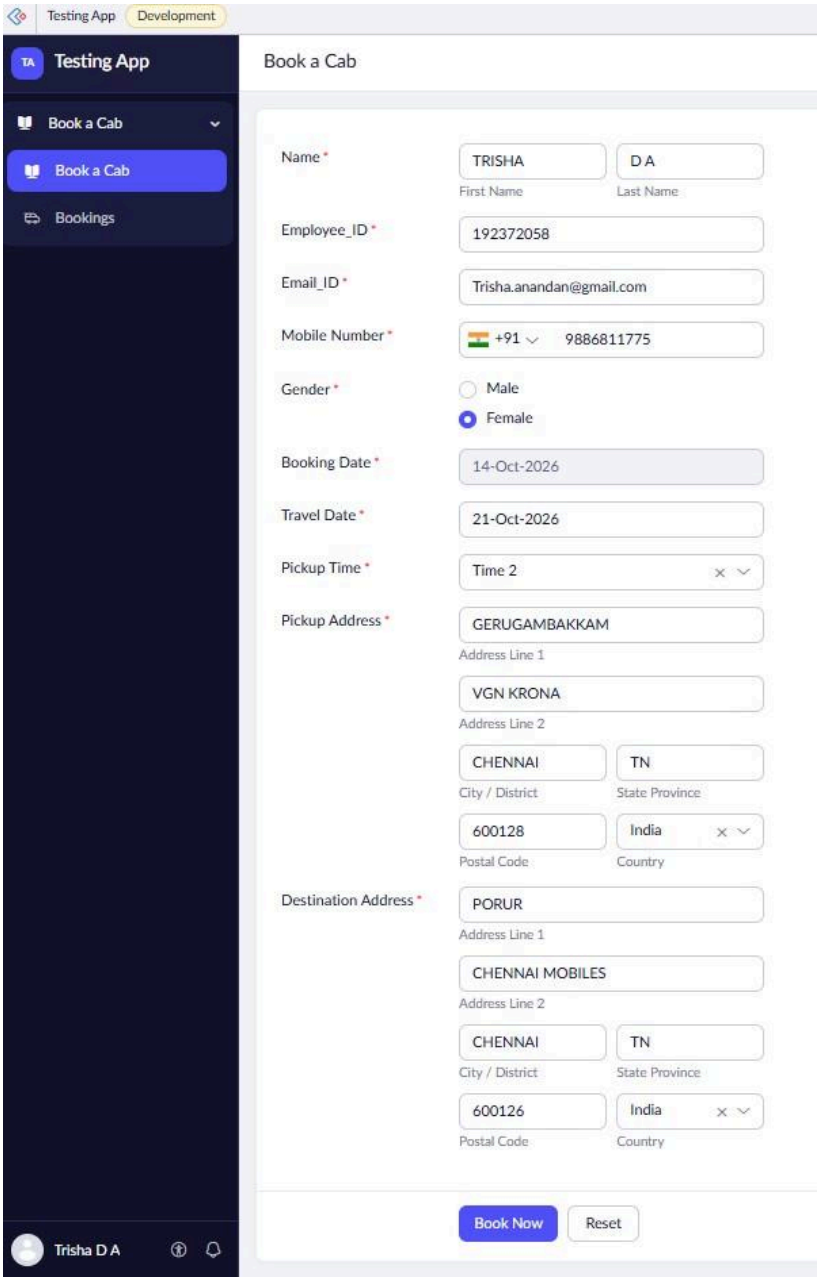

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application for the Car Booking Reservation System.
4. Create a new form named **Car Booking Reservation Form**.
5. Add the required fields:
    - Booking ID
    - Customer Name
    - Email ID
    - Mobile Number
    - From
    - To
    - Booking Type (Rental / Outstation)
    - Package Type
    - Hours/Days
    - Travel Date
    - Pickup Time
    - Pickup Address
    - Destination Address
    - Number of Passengers
    - Car Type (Hatchback / Sedan / SUV)
    - Booking Status (Pending / Confirmed / Cancelled)
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Enter sample cab booking details into the form.

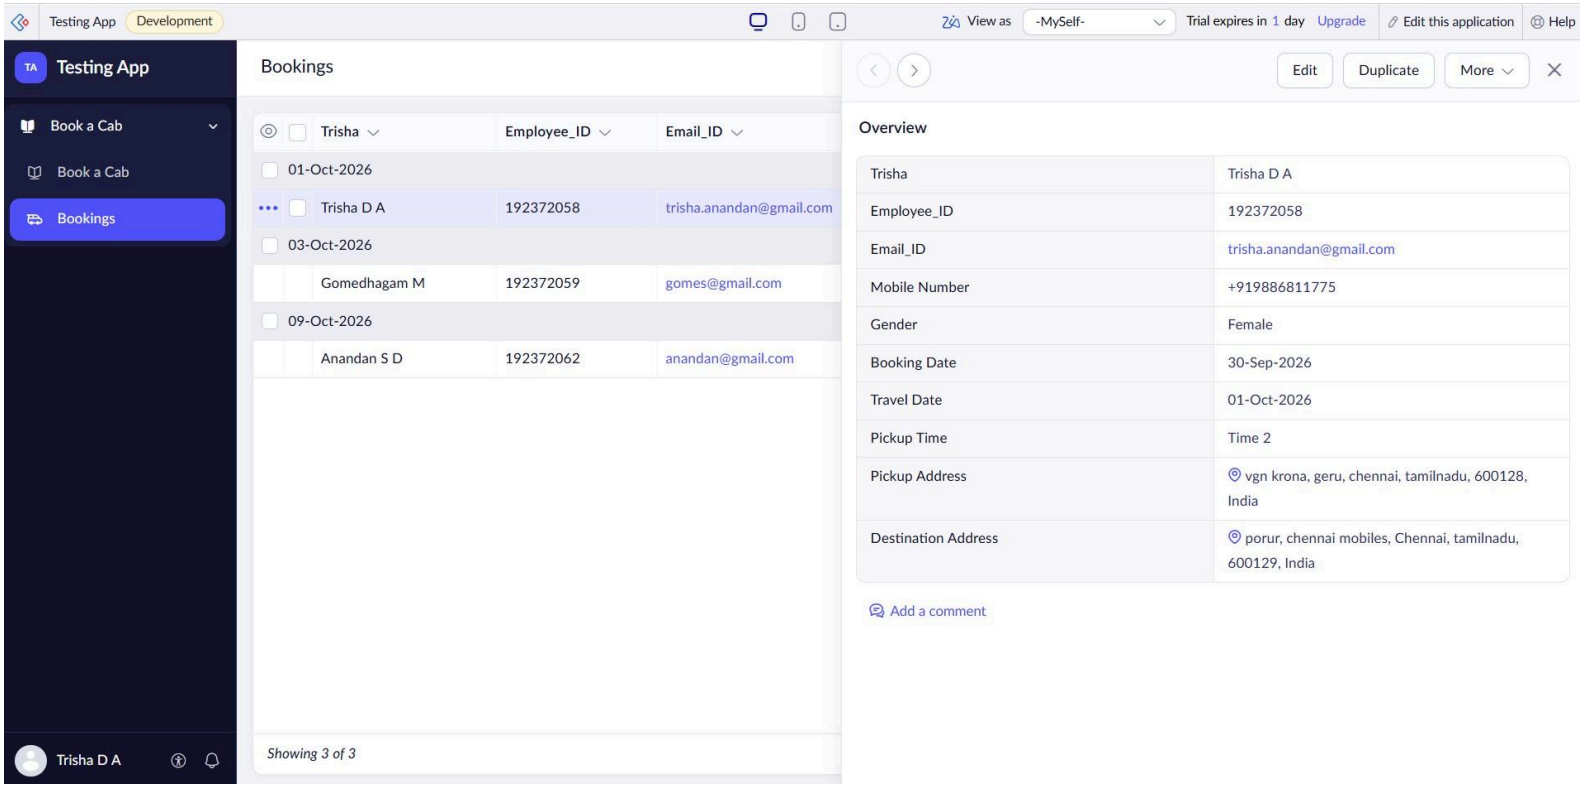

10. Submit the form and verify that the entered data is stored in the cloud.
11. Test the application by entering different booking details for rental and outstation trips.
12. Verify that the Car Booking Reservation System works successfully as a SaaS application.

Implementation

Input:

Output:

Result

Thus, a Car Booking Reservation System was created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
