Experiment – 4

Library Book Reservation System Using Zoho One (SaaS)

Aim

To create a Library Book Reservation System for SIMATS Library using Zoho One as a cloud-based Software as a Service (SaaS) application.

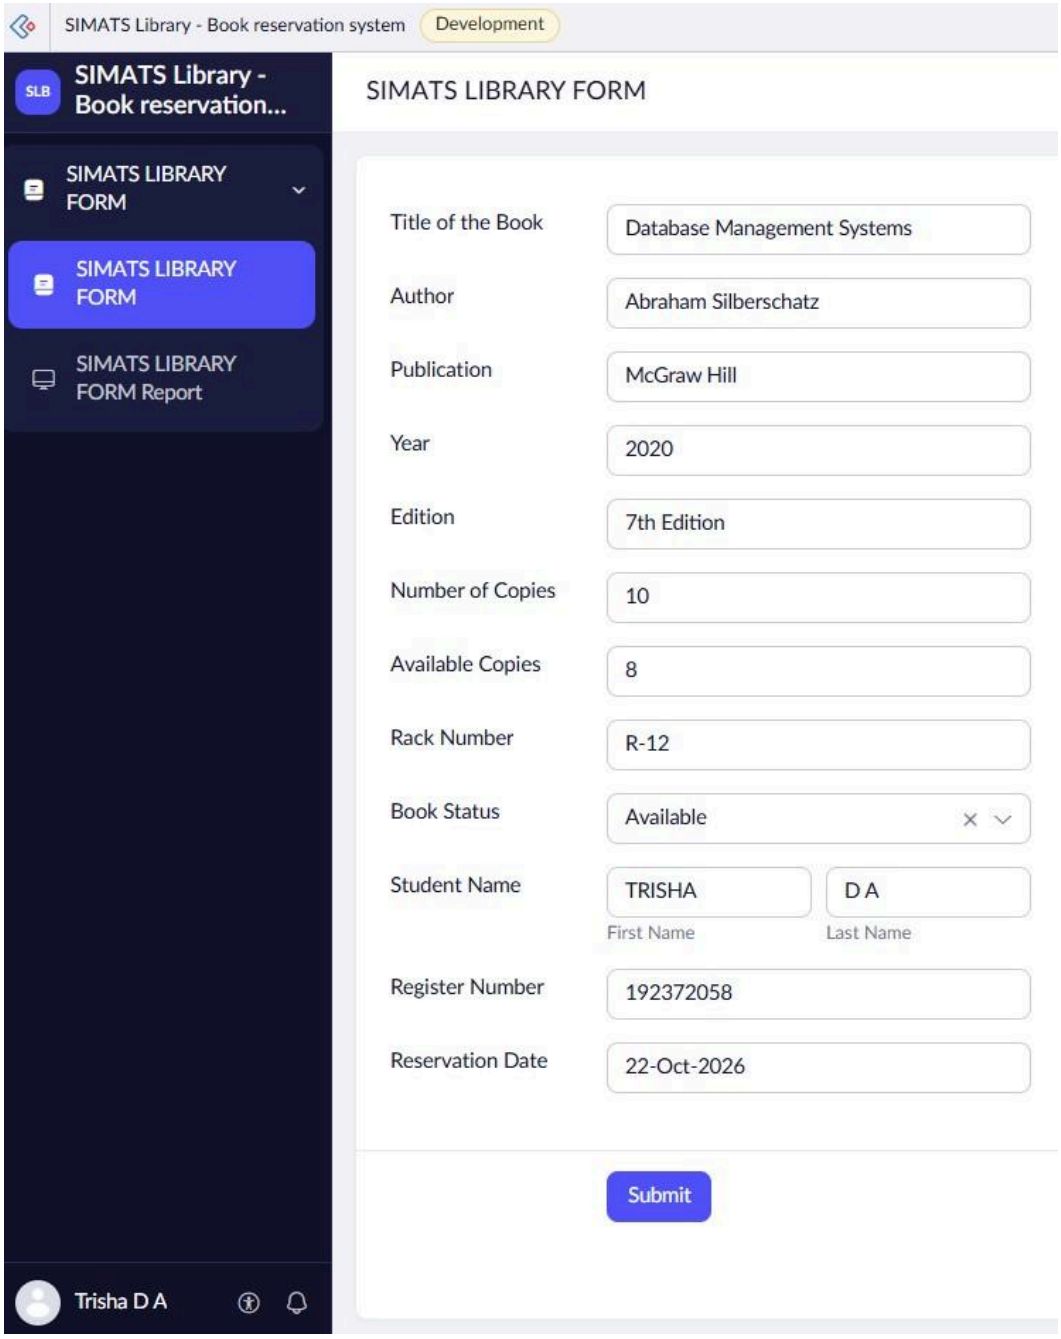

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application named SIMATS Library Book Reservation System.
4. Create a new form named Library Book Details Form.
5. Add the required fields:
    - Book ID
    - Title of the Book
    - Author
    - Publication
    - Year
    - Edition
    - Number of Copies
    - Available Copies
    - Rack Number
    - Book Status (Available / Taken / Returned)
    - Student Name
    - Register Number
    - Reservation Date
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Save and publish the form.
9. Enter sample book and reservation details into the form.
10. Submit the form and verify that the entered data is stored in the cloud.
11. Test the application by entering different book details and checking their availability status.

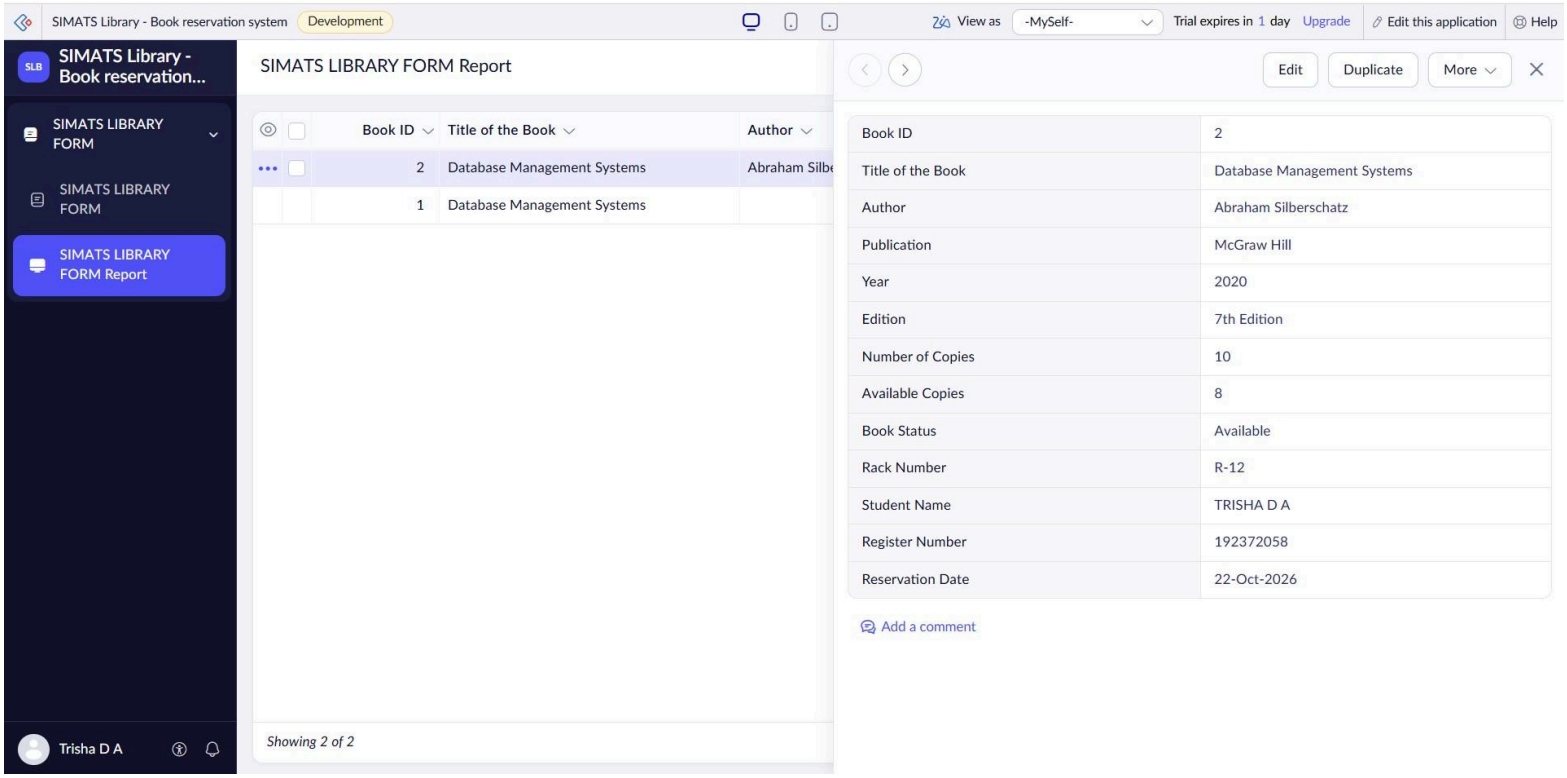

12. Verify that the Library Book Reservation System works successfully as a SaaS application.

Implementation

Input:

Output:

Result

Thus, a Library Book Reservation System for SIMATS Library was created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
