Experiment – 5

Mark Sheet Processing System Using Zoho One (SaaS)

Aim

To create a Mark Sheet Processing System using Zoho One as a cloud-based Software as a Service (SaaS) application.

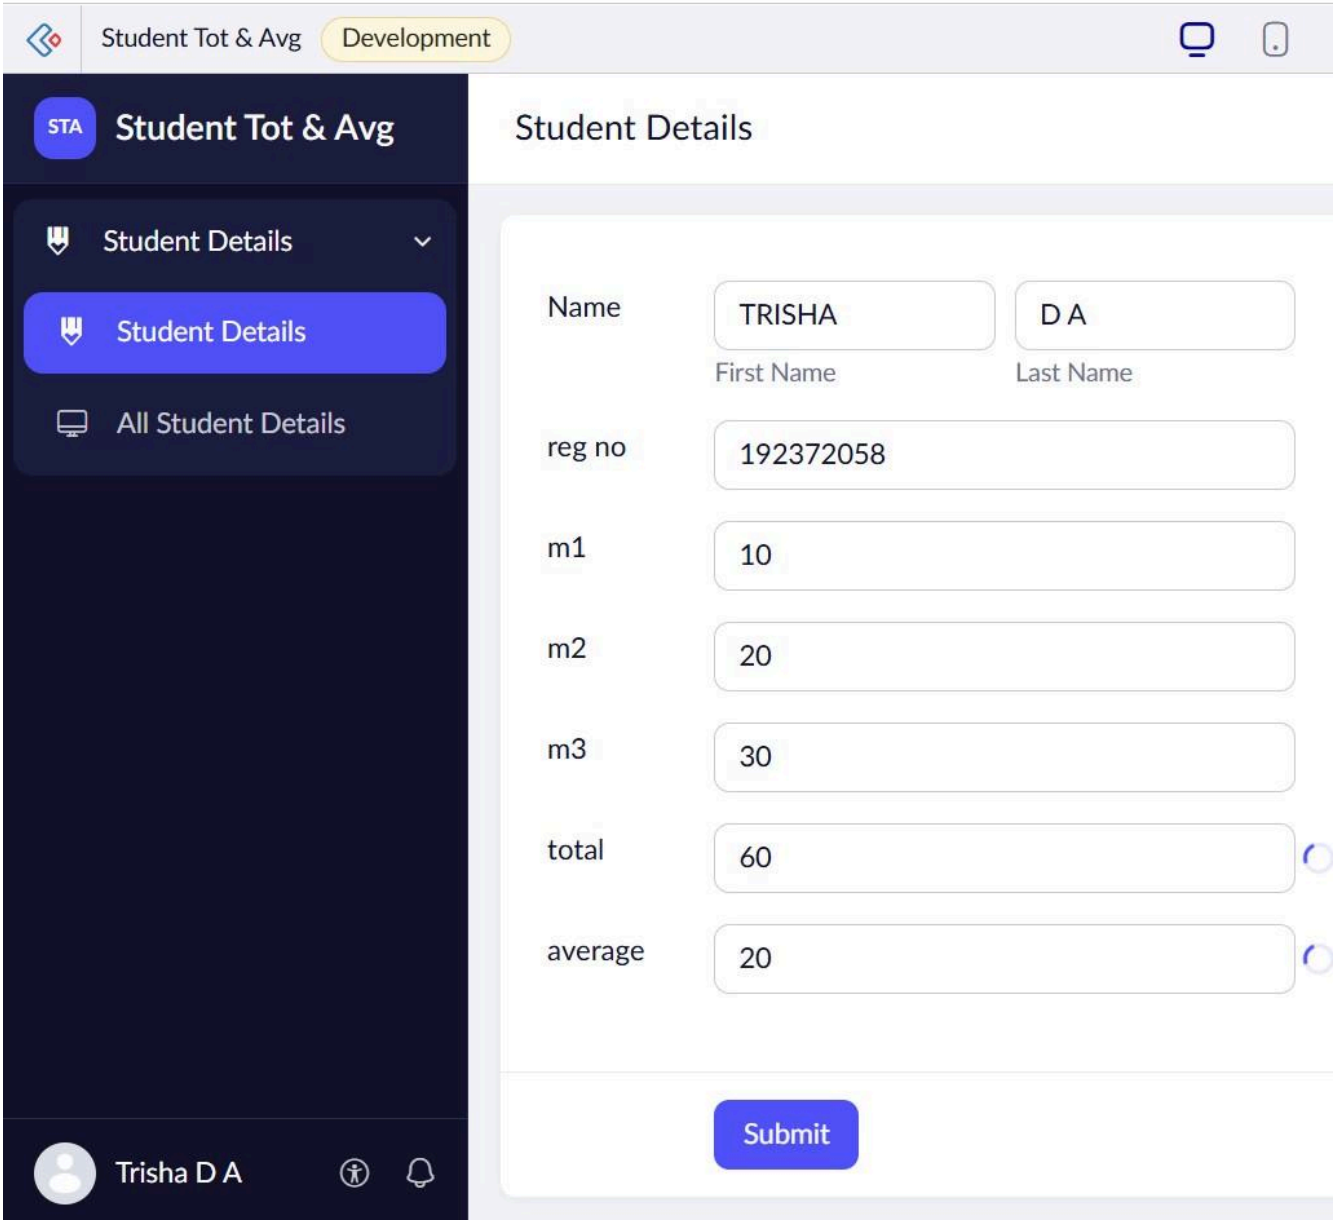

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application named Mark Sheet Processing System.
4. Create a new form named Student Mark Sheet Form.
5. Add the required fields:
    - Student Name
    - Register Number
    - Department
    - Semester
    - Subject 1 Marks
    - Subject 2 Marks
    - Subject 3 Marks
    - Subject 4 Marks
    - Subject 5 Marks
    - Total Marks
    - Average
    - Percentage
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Configure workflows to calculate total marks, average, percentage, and overall performance.
9. Save and publish the form.
10. Enter sample student details and subject marks.
11. Submit the form and verify that the student records are stored in the cloud.
12. Test the application using different student marks and verify the calculated results.

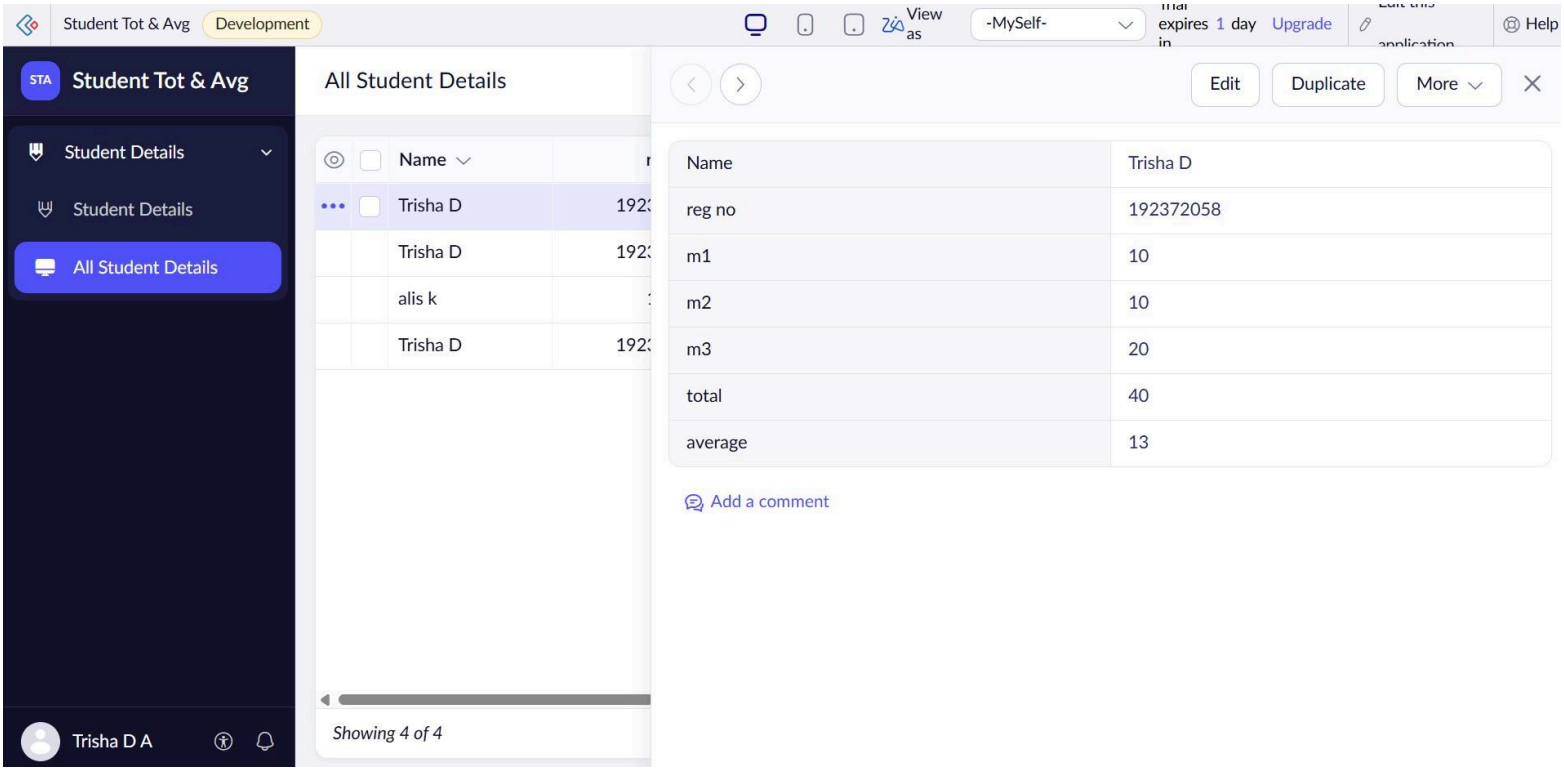

13. Verify that the Mark Sheet Processing System works successfully as a SaaS application.

Implementation

Input:

Output:

Result

Thus, a Mark Sheet Processing System was created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
