Experiment – 1

Flight Reservation System Using Zoho One (SaaS)

Aim

To create a Flight Reservation System using Zoho One as a cloud-based Software as a Service (SaaS) application.

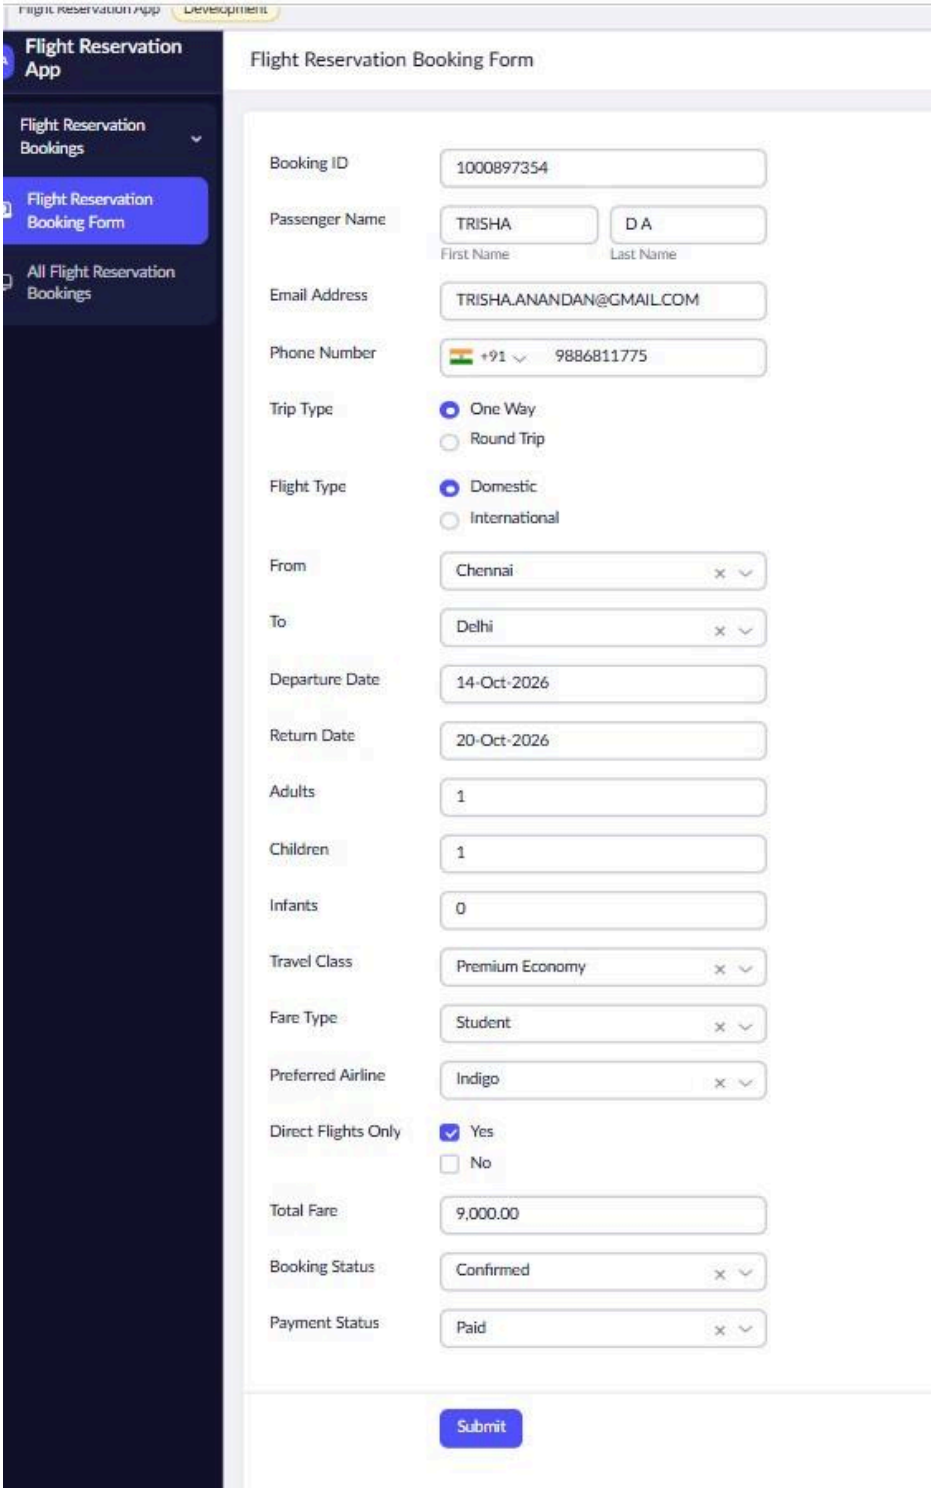

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application for the Flight Reservation System.
4. Create a new form named **Flight Reservation Booking Form**.
5. Add the required fields:
    - Booking ID
    - Passenger Name
    - Email Address
    - Phone Number
    - Trip Type (One Way / Round Trip)
    - Flight Type (Domestic / International)
    - From
    - To
    - Departure Date
    - Return Date
    - Adults
    - Children
    - Infants
    - Travel Class

    - Fare Type
    - Preferred Airline
    - Direct Flights Only
    - Total Fare
    - Booking Status
    - Payment Status
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Configure workflows for flight detail validation, fare calculation, and booking status management.
9. Save and publish the form.
10. Enter sample flight reservation details into the form.
11. Submit the form and verify that the entered data is stored in the cloud.
12. Test the application by entering different flight booking details, including one-way, round-trip, domestic, and international flights.
13. Verify that the Flight Reservation System works successfully as a SaaS application.

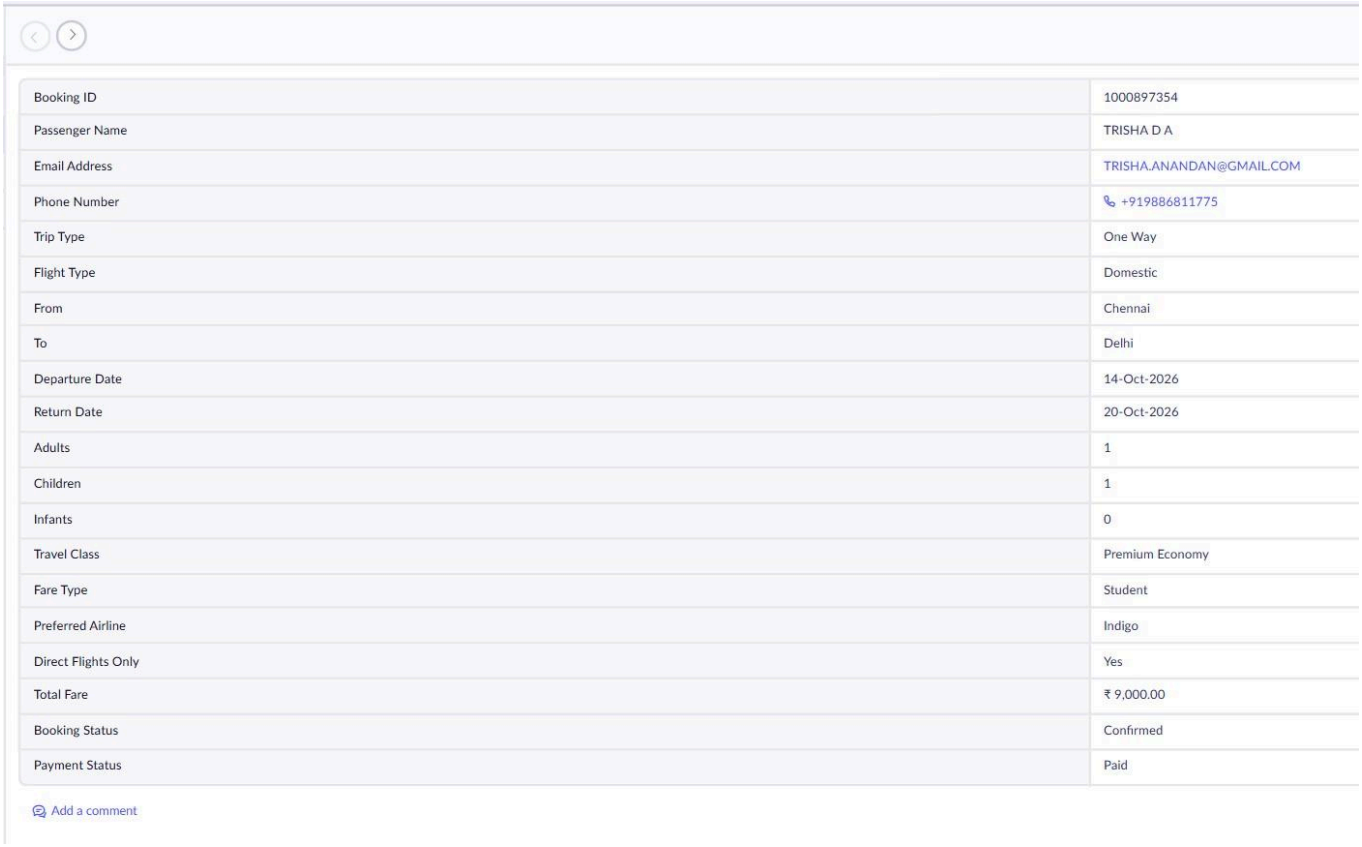

Implementation

Input:

Output:

Result

Thus, a Flight Reservation System was created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
