Experiment – 6

Payroll Processing System Using Zoho One (SaaS)

Aim

To create a Payroll Processing System using Zoho One as a cloud-based Software as a Service (SaaS) application.

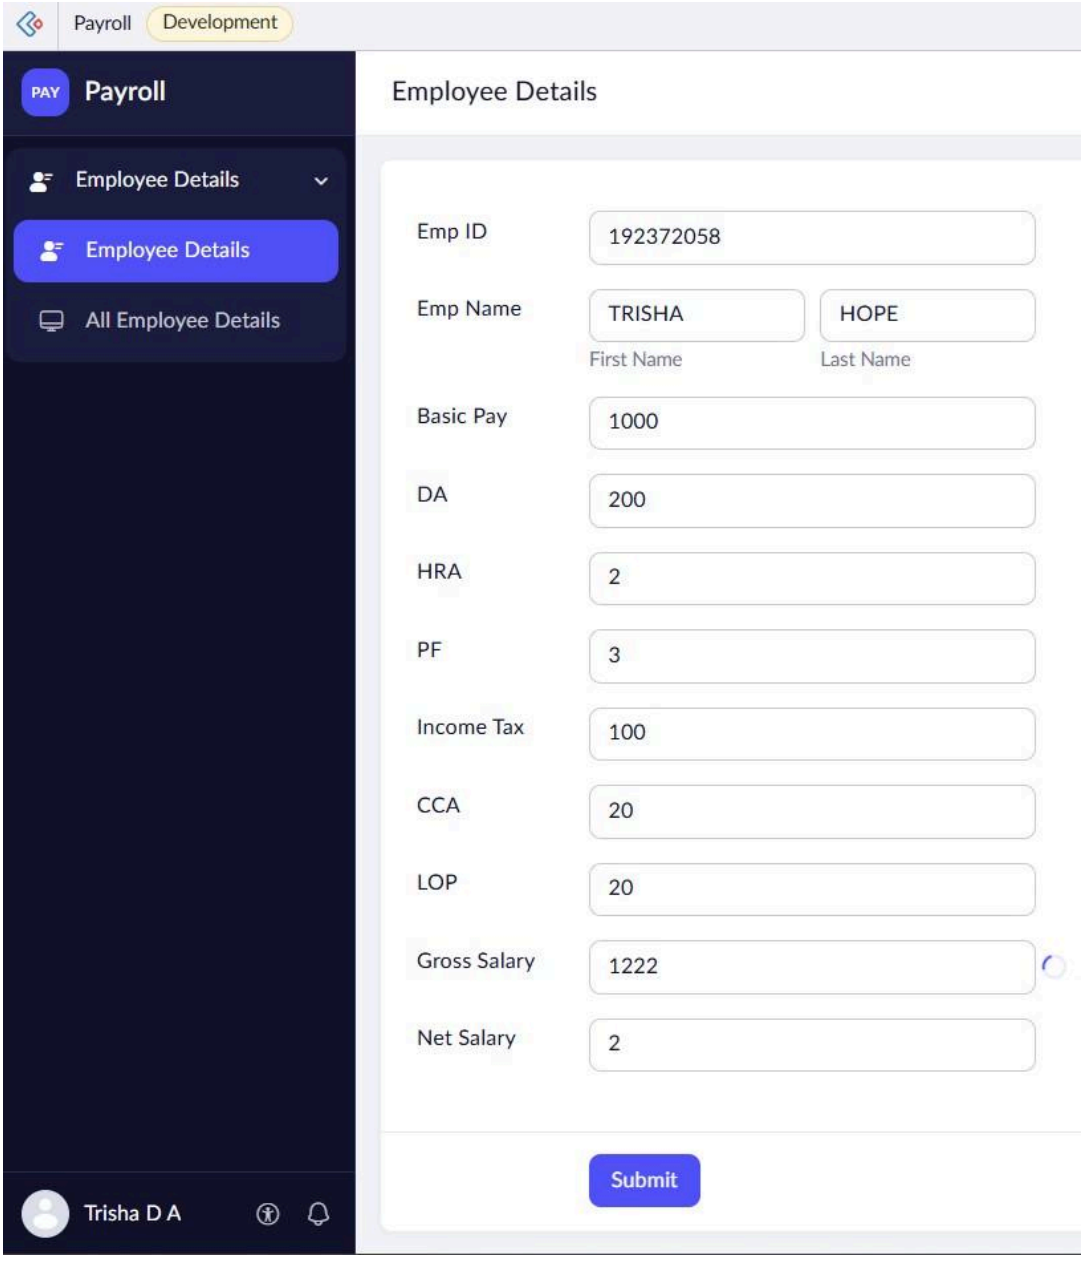

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application named Payroll Processing System.
4. Create a new form named Employee Payroll Form.
5. Add the required fields:
    - Employee ID
    - Employee Name
    - Department
    - Designation
    - Experience in Present Organization
    - Overall Experience
    - Basic Pay
    - House Rent Allowance (HRA)
    - Dearness Allowance (DA)
    - Travel Allowance (TA)
    - Gross Pay
    - Deductions
    - Net Pay
    - Pay Month
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Configure workflows to calculate gross pay and net pay.
9. Save and publish the form.
10. Enter sample employee details and salary information.
11. Submit the form and verify that the payroll records are stored in the cloud.

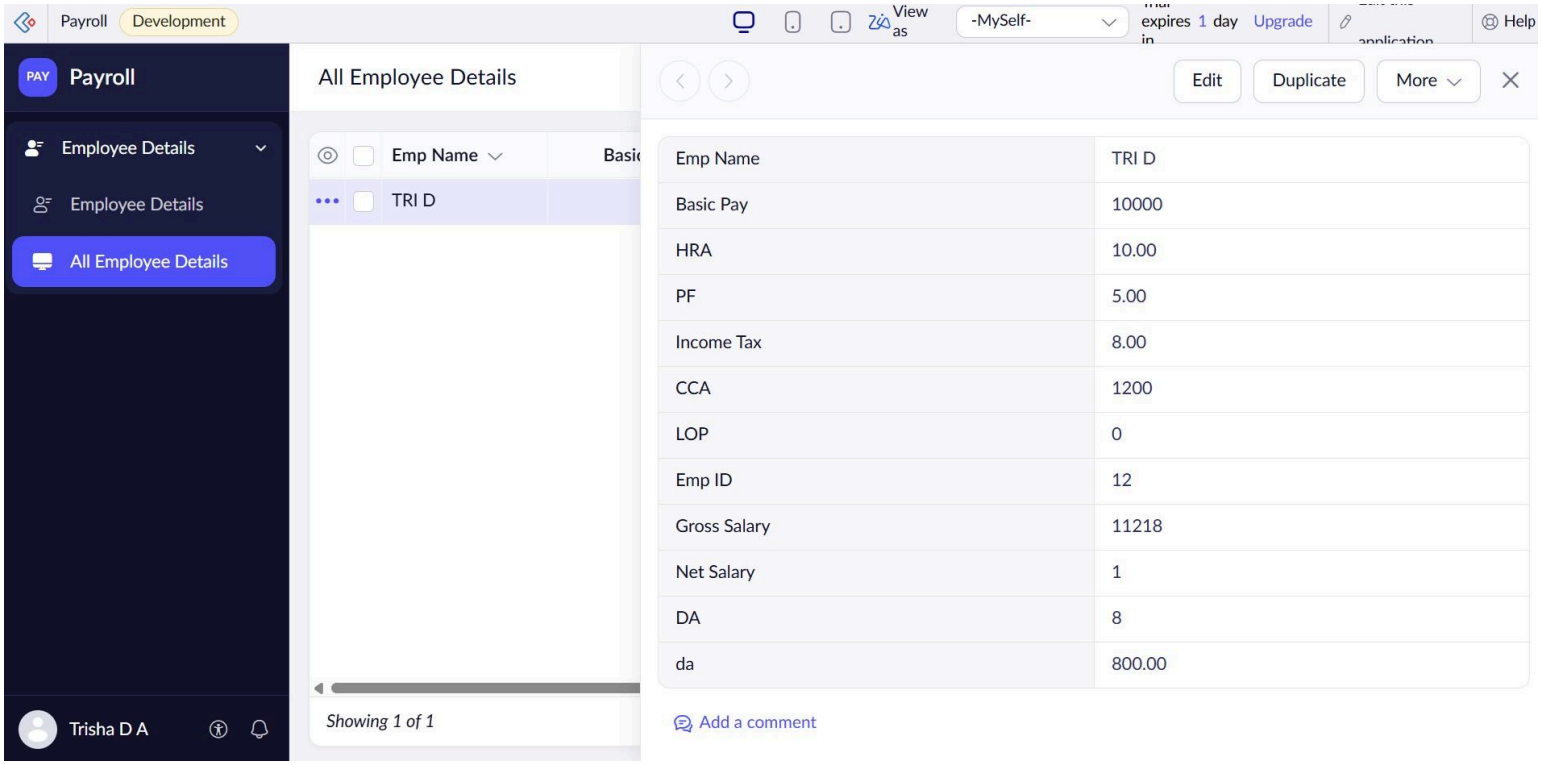

12. Test the application using different employee salary details and verify the calculations.
13. Verify that the Payroll Processing System works successfully as a SaaS application.

Implementation

Input:

Output:

Result

Thus, a Payroll Processing System was created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
