Experiment – 7

Students Attendance System Using Zoho One (SaaS)

Aim

To create a Students Attendance System using Zoho One as a cloud-based Software as a Service (SaaS) application.

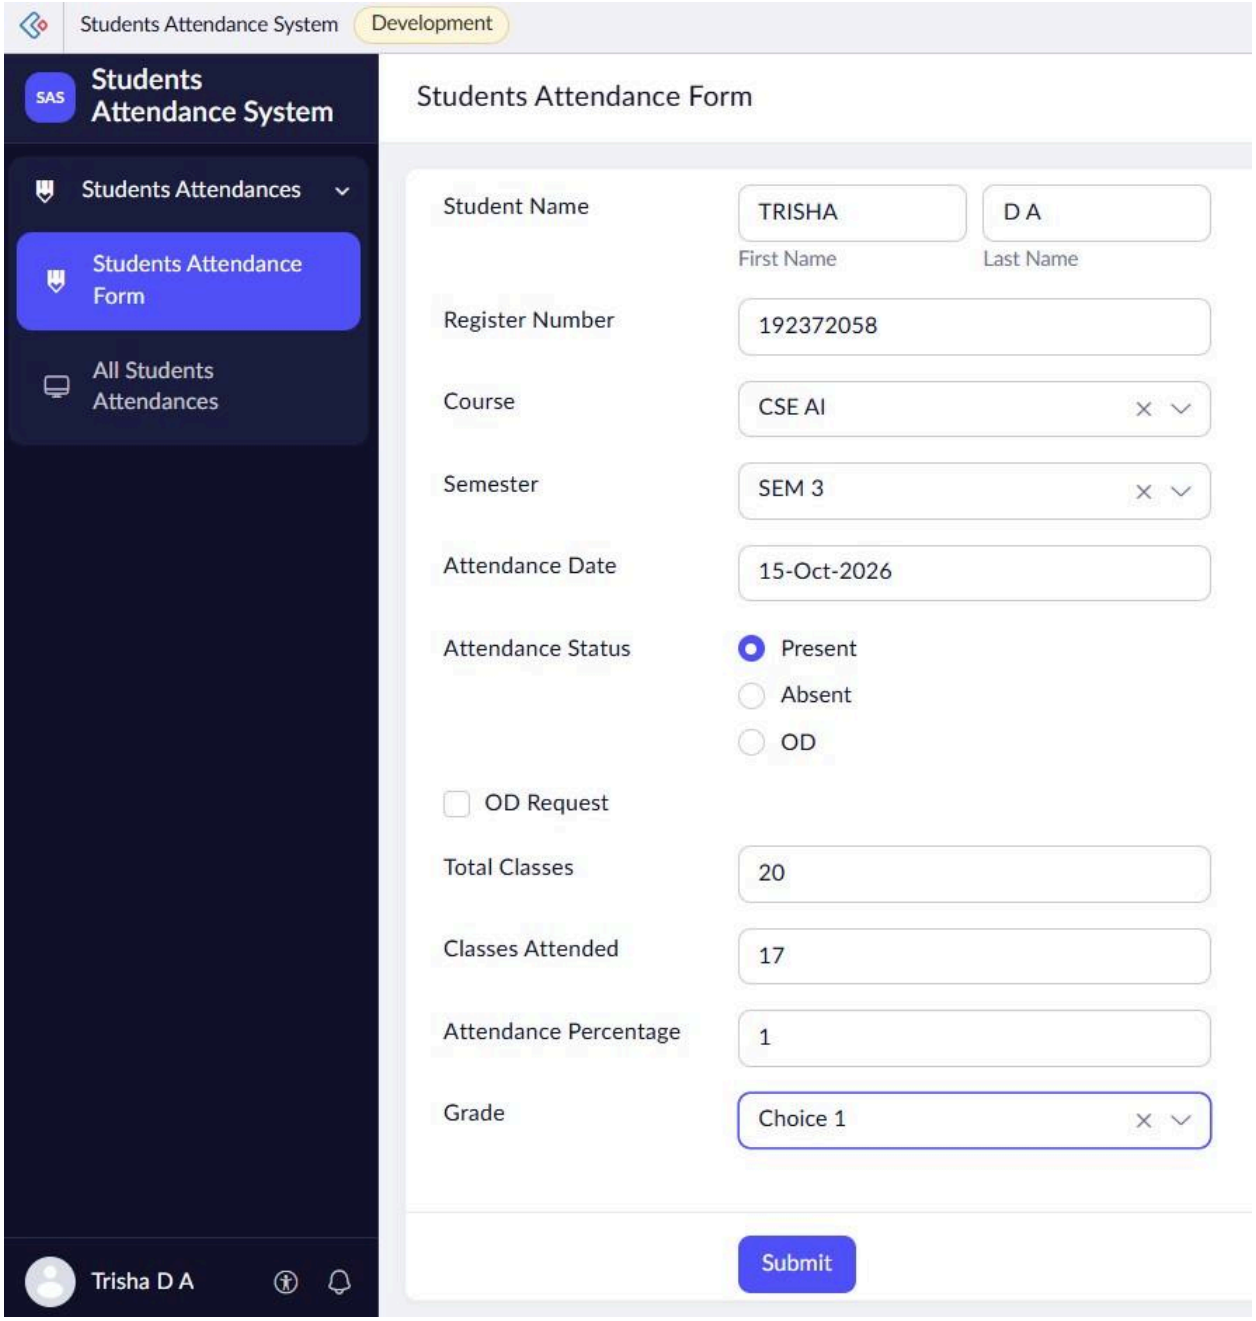

Procedure

1. Log in to the Zoho One cloud platform.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application named Students Attendance System.
4. Create a new form named Student Attendance Form.
5. Add the required fields:
    - Attendance ID
    - Student Name
    - Register Number
    - Course
    - Semester
    - Attendance Date
    - Attendance Status (Present / Absent / OD)
    - OD Request (Yes / No)
    - Total Classes
    - Classes Attended
    - Attendance Percentage
    - Grade
6. Configure the field types according to the data required.
7. Design and arrange the form for easy user interaction.
8. Configure a workflow to calculate attendance percentage automatically using the total classes and classes attended.
9. Save and publish the form.
10. Enter sample student attendance details into the form.
11. Submit the form and verify that the attendance records are stored in the cloud.

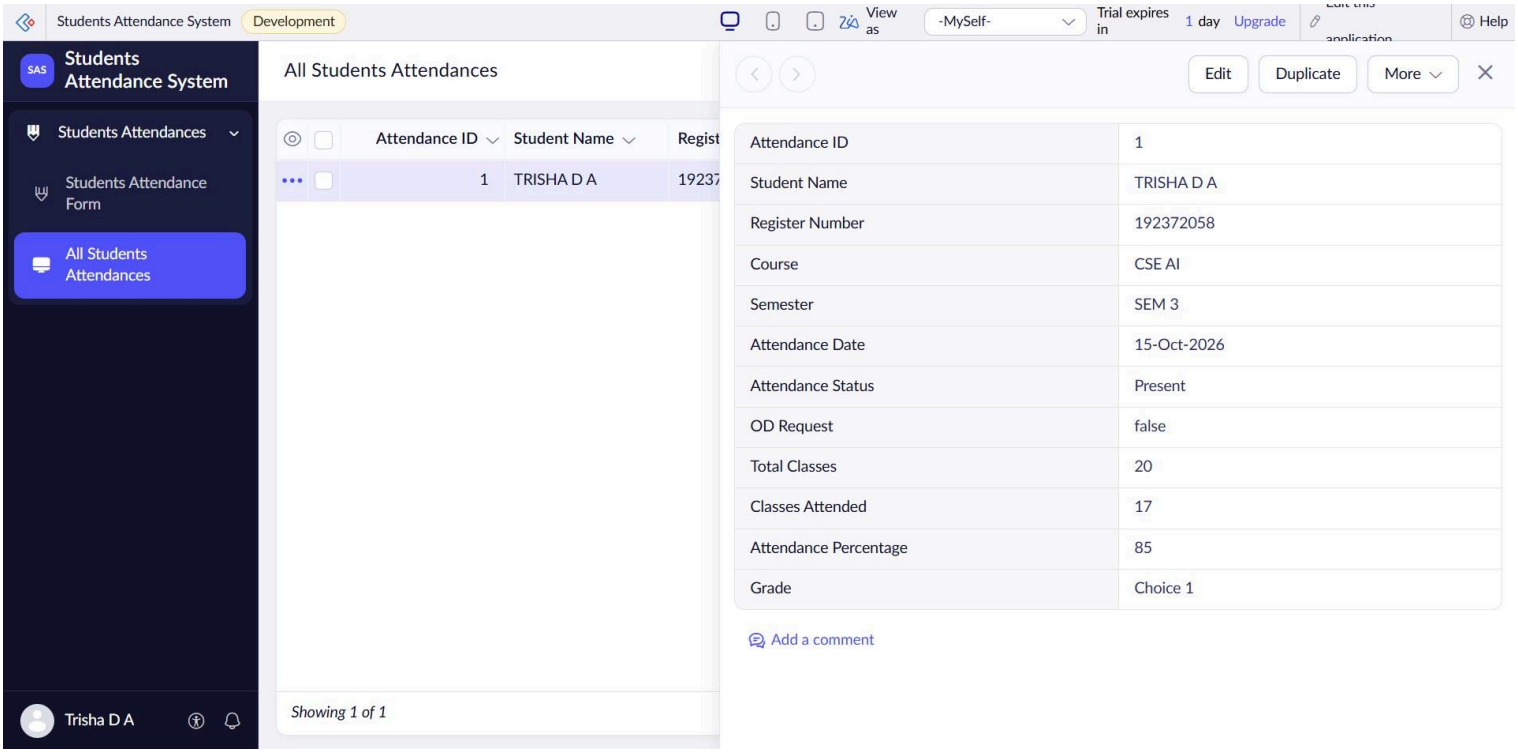

12. Test the application using different attendance details and verify the calculated attendance percentage.
13. Verify that the Students Attendance System works successfully as a SaaS application.

Implementation

Input:

Output:

Result

Thus, a Students Attendance System was created using Zoho One and demonstrated as a Software as a Service (SaaS) application.
