# Experiment – 11

## **Title:** Online Supermarket System Using Zoho One (SaaS)

### Aim

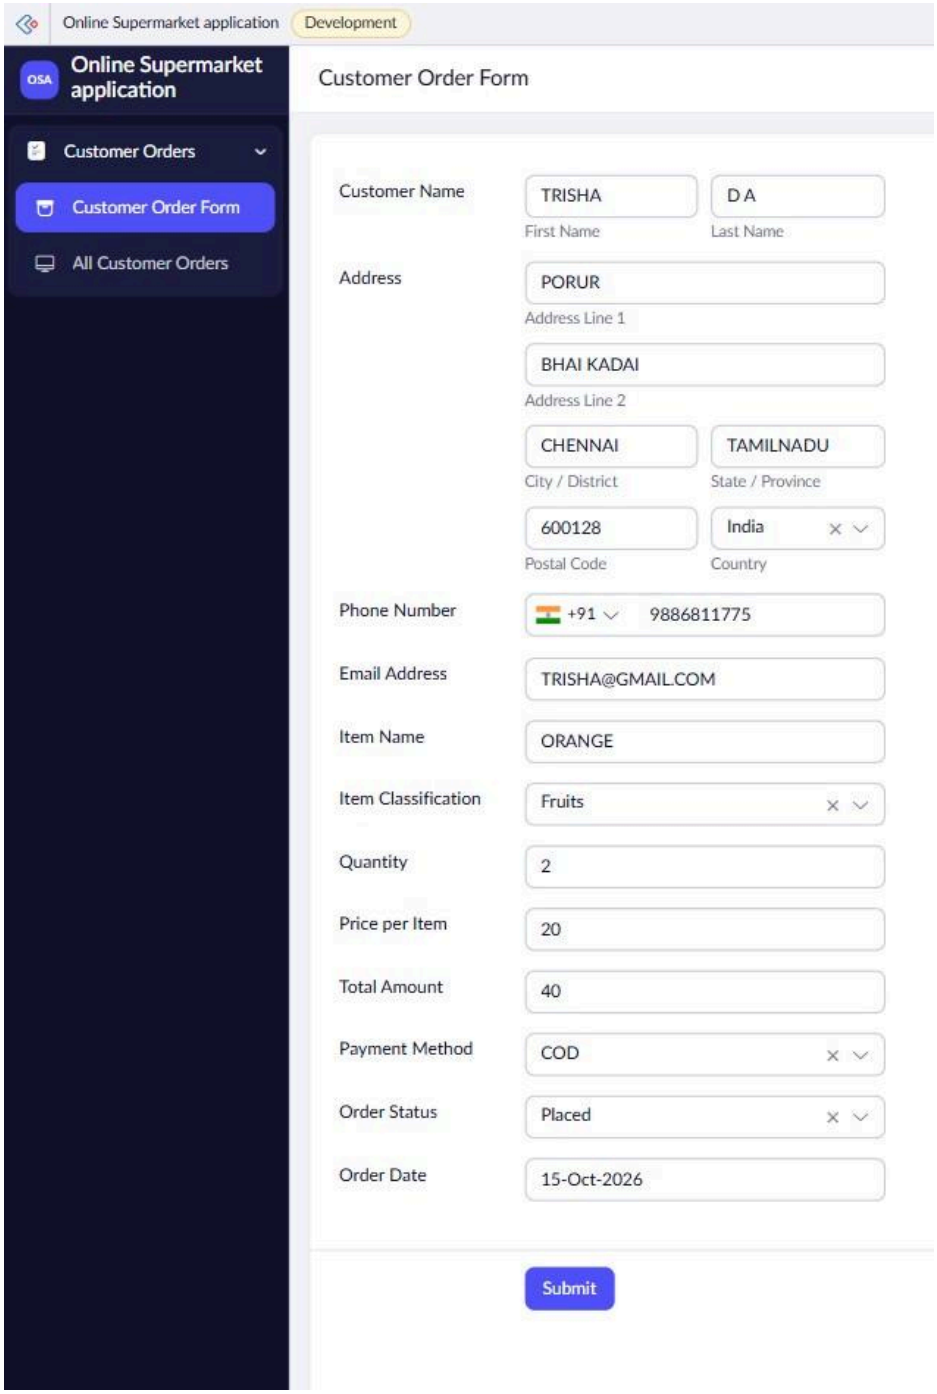

To create a simple cloud-based Online Supermarket application using Zoho Creator to manage customer details, supermarket items, quantities, prices, and item classifications.

### Procedure

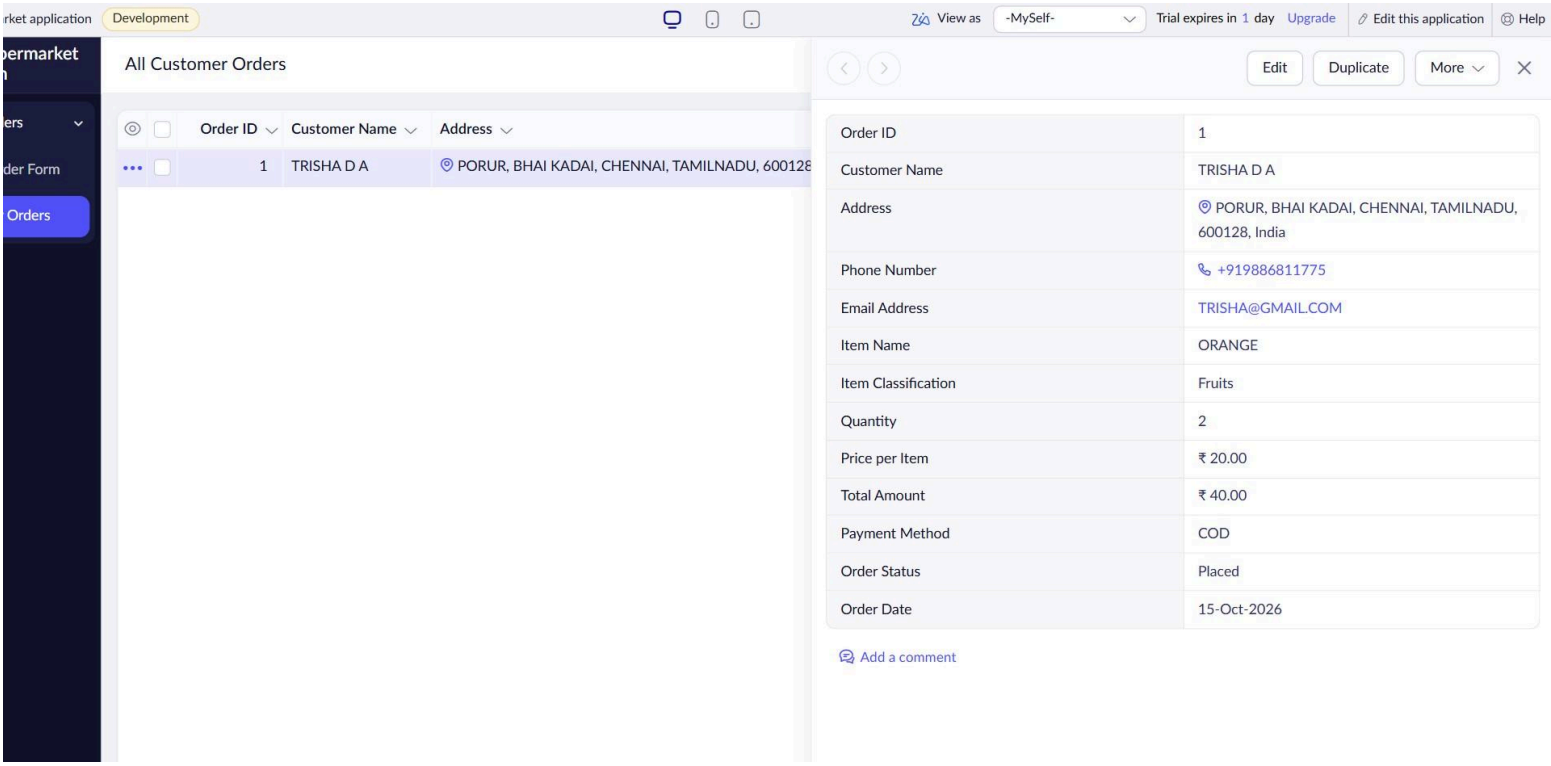

1. Log in to Zoho Creator using a valid account.
2. Create a new application named **Online Supermarket System**.
3. Create a Customer Order Form with customer name, address, phone number, email, item name, quantity, price, and payment method.
4. Create an Item Classification Form to classify products into categories such as groceries, fruits, vegetables, dairy products, beverages, snacks, and household items.
5. Add fields for product name, category, brand, price, available stock, and product description.
6. Configure dropdown fields for item classification and payment method.
7. Enter sample customer and product details.
8. Create reports to display customer orders and classified supermarket items.
9. Save the application and verify the entered records.

## Implementation

## Input:

## Output:

## Result

Thus, a cloud-based Online Supermarket System was created using Zoho Creator (SaaS) to manage customer information, supermarket products, item classifications, and orders efficiently.
